

PIT OPTIMISATION / SCOPING STUDY

Legacy Iron Ore Ltd is seeking quotes for carrying out a pit optimisation/scoping study at its Mt Celia Project. The Mt Celia project contains three ore bodies located in close proximity to each other with an established JORC compliant resource for gold.

The deliverables are likely to include:

- Conceptual economic evaluation considering the ore bodies;
- Optimised inputs and outputs, pit and stage designs and mine production schedule;
- A report detailing outcome of the study.

Legacy Iron Ore plans to complete the study by 21 November 2017.

All the interested parties are requested to contact info@legacyiron.com.au to get more details about the work (if required) or provide quotes by 1st November 2017.
